

Product Description

Pioneering GTPase and Oncogene Product Development since 2010

MOUSE 4-1BB LIGAND PROTEIN, HFC TAG

货号: 12195

产品全名: Mouse 4-1BB Ligand 蛋白

规格: 10/50/100 μg 基因符号 Tnfsf9

目标蛋白: 4-1BB Ligand UNIPROTID: P41274

描述: Recombinant mouse 4-1BB Ligand protein with N-terminal human

Fc tag

背景: Cytokine that binds to TNFRSF9. Induces the proliferation of activated peripheral blood T-cells. May have a role in activation-induced cell death (AICD). May play a role in cognate interactions between T-cells and B-cells/macrophages.[UniProtKB/Swiss-Prot Function]

物种/宿主: HEK293

分子量: The protein has a predicted molecular mass of 49.1 kDa after removal of the signal peptide. The apparent molecular mass of hFc-m4-1BB Ligand is approximately 55-70 kDa due to glycosylation.

分子特征: hFc(Glu99-Ala330) Mouse 4-1BB Ligand(Arg104-Glu309)

纯化: The purity of the protein is greater than 95% as determined by SDS-PAGE and Coomassie blue staining.

Formulation & Reconstitution: Lyophilized from nanodisc solubilization buffer (20 mM Tris-HCl, 150 mM NaCl, pH 8.0). Normally 5% – 8% trehalose is added as protectants before lyophilization.

储存和运输: Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient temperature.
