UNIPROT ID: P35222

背景: Beta-catenin is an adherens junction protein. Adherens junctions (AJs; also called the zonula adherens) are critical for the establishment and maintenance of epithelial layers, such as those lining organ surfaces. AJs mediate adhesion between cells, communicate a signal that neighboring cells are present, and anchor the actin cytoskeleton. In serving these roles, AJs regulate normal cell growth and behavior.

抗原: The antiserum was produced against synthesized peptide derived from human Catenin-beta around the phosphorylation site of Ser37. AA range:3-52
