

Product Description

ARF1(Δ17Q71L) PROTEIN

产品名称: Arf1(Δ17Q71L) 突变蛋白

货号: 10123

产品全名: Arf1 Protein Δ17 Q71L 突变蛋白

基因符号 ADP-ribosylation factor 1

Source: 人 recombinant, His6-tag

Expression 种属反应性: E. coli

分子量: 21 kDa

纯化: >95% by SDS-PAGE

Introduction: Arf1 is a member of the ARF super-family. ARF genes encode small GTPases that increase the ADP-ribosyltransferase activity of cholera toxin and are critical for vesicular trafficking as activators of phospholipase D. Arf1 protein is localized to the Golgi apparatus and has a central role in intra-Golgi transport.

Amino Acid Sequence (1-181, Δ17, Q71L)

Properties

Physical Appearance (form): Dissolved in 20mM Tris-HCl, pH8.0, 150mM NaCl.

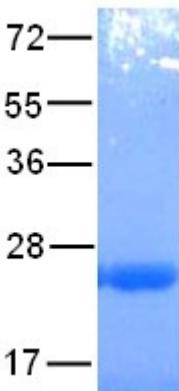

Physical Appearance (form): White or clear

Concentration: 1 mg/mL

Storage: -80°C

Preparation Instructions:

Centrifuge the vial before open the cap and reconstitute in water. Adding of 10 mM β-mercaptoethanol or 1 mM DTT into the solution to protect the protein is recommended and using of non-ionic detergents such as n-Dodecyl β-D-maltoside(DoDM) or polyethylene detergents (e.g. C12E10) also help to stabilize the protein. Avoid repeated freezing and thawing after reconstitution. The purity of His-tagged Arf1 Δ17Q71L was determined by SDS-PAGE and Coomassie Brilliant Blue Staining
