货号: 28275

产品全名: CD74(DMC674) IgG1 Chimeric 单抗

基因符号 DHLAG; HLADG; Ia-GAMMA; II; p33

描述: CD74 antibody(DMC674) IgG1 Chimeric 单抗

背景: The protein encoded by this gene associates with class II major histocompatibility complex (MHC) and is an important chaperone that regulates antigen presentation for immune response. It also serves as cell surface receptor for the cytokine macrophage migration inhibitory factor (MIF) which; when bound to the encoded protein; initiates survival pathways and cell proliferation. This protein also interacts with amyloid precursor protein (APP) and suppresses the production of amyloid beta (Abeta). Multiple alternatively spliced transcript variants encoding different isoforms have been identified. [provided by RefSeq; Aug 2011]
