

HUMAN CD93 PROTEIN, MFC TAG

货号: 11491

产品全名: 人 CD93 蛋白

规格: 10/50/100 µg

基因符号 C1qR;C1qR(p);C1qRp;CDw93

目标蛋白: CD93

UNIPROT ID: Q9NPY3

描述: Recombinant human CD93 Protein with C-terminal Mouse Fc tag

背景: The protein encoded by this gene is a cell-surface glycoprotein and type I membrane protein that was originally identified as a myeloid cell-specific marker. The encoded protein was once thought to be a receptor for C1q, but now is thought to instead be involved in intercellular adhesion and in the clearance of apoptotic cells. The intracellular cytoplasmic tail of this protein has been found to interact with moesin, a protein known to play a role in linking transmembrane proteins to the cytoskeleton and in the remodelling of the cytoskeleton. [provided by RefSeq, Jul 2008]

物种/宿主: HEK293

分子量: The protein has a predicted molecular mass of 84.5 kDa after removal of the signal peptide. The apparent molecular mass of CD93-mFc is approximately 100-130 kDa due to glycosylation.

分子特征: CD93(Thr22-Lys580) mFc(Pro99-Lys330)

纯化: The purity of the protein is greater than 95% as determined by SDS-PAGE and Coomassie blue staining.

Formulation & Reconstitution: Lyophilized from nanodisc solubilization buffer (20 mM Tris-HCl, 150 mM NaCl, pH 8.0). Normally 5% – 8% trehalose is added as protectants before lyophilization.

储存和运输: Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient temperature.
