

HUMAN MFAP4 PROTEIN

货号: 12266

产品全名: 人 MFAP4 蛋白

规格: 10/50/100 µg

基因符号 MFAP4

目标蛋白: MFAP4

UNIPROT ID: P55083

描述: Recombinant human MFAP4 Protein with C-terminal 6xHis tag

背景: This gene encodes a protein with similarity to a bovine microfibril-associated protein. The protein has binding specificities for both collagen and carbohydrate. It is thought to be an extracellular matrix protein which is involved in cell adhesion or intercellular interactions. The gene is located within the Smith-Magenis syndrome region. Two transcript variants encoding different isoforms have been found for this gene.

[provided by RefSeq, Nov 2010]

物种/宿主: HEK293

分子量: The protein has a predicted molecular mass of 27.3 kDa after removal of the signal peptide. The apparent molecular mass of MFAP4-His is approximately 35-55 kDa due to glycosylation.

分子特征: MFAP4(Val22-Ala255) 6xHis tag

纯化: The purity of the protein is greater than 85% as determined by SDS-PAGE and Coomassie blue staining.

Formulation & Reconstitution: Lyophilized from nanodisc solubilization buffer (20 mM Tris-HCl, 150 mM NaCl, pH 8.0). Normally 5% – 8% trehalose is added as protectants before lyophilization.

储存和运输: Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient temperature.
