

HUMAN NTRK3 PROTEIN, HFC TAG

货号: 11366

产品全名: 人 NTRK3 蛋白

规格: 10/50/100 µg

基因符号 gp145(trkC);GPI45-TrkC;TRKC

目标蛋白: NTRK3

UNIPROT ID: Q16288

描述: Recombinant human NTRK3 protein with C-terminal human Fc tag

背景: This gene encodes a member of the neurotrophic tyrosine receptor kinase (NTRK) family. This kinase is a membrane-bound receptor that, upon neurotrophin binding, phosphorylates itself and members of the MAPK pathway. Signalling through this kinase leads to cell differentiation and may play a role in the development of proprioceptive neurons that sense body position. Mutations in this gene have been associated with medulloblastomas, secretory breast carcinomas and other cancers. Several transcript variants encoding different isoforms have been found for this gene. [provided by RefSeq, Jul 2011]

物种/宿主: HEK293

分子量: The protein has a predicted molecular mass of 70.9 kDa after removal of the signal peptide. The apparent molecular mass of NTRK3-hFc is approximately 100-130 kDa due to glycosylation.

分子特征: NTRK3(Cys32-Thr429) hFc(Glu99-Ala330)

纯化: The purity of the protein is greater than 95% as determined by SDS-PAGE and Coomassie blue staining.

Formulation & Reconstitution: Lyophilized from nanodisc solubilization buffer (20 mM Tris-HCl, 150 mM NaCl, pH 8.0). Normally 5% – 8% trehalose is added as protectants before lyophilization.

储存和运输: Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient temperature.
