

HUMAN ULBP2 PROTEIN, HFC TAG

货号: 11742

产品全名: 人 ULBP2 蛋白

规格: 10/50/100 µg

基因符号 ALCAN- α ;N2DL2;NKG2DL2;RAET1H;RAET1L

目标蛋白: ULBP2

UNIPROT ID: Q9BZM5

描述: Recombinant human ULBP2 protein with C-terminal human Fc tag

背景: This gene encodes a major histocompatibility complex (MHC) class I-related molecule that binds to the NKG2D receptor on natural killer (NK) cells to trigger release of multiple cytokines and chemokines that in turn contribute to the recruitment and activation of NK cells. The encoded protein undergoes further processing to generate the mature protein that is either anchored to membrane via a glycosylphosphatidylinositol moiety, or secreted. Many malignant cells secrete the encoded protein to evade immunosurveillance by NK cells. This gene is located in a cluster of multiple MHC class I-related genes on chromosome 6. [provided by RefSeq, Jul 2015]

物种/宿主: HEK293

分子量: The protein has a predicted molecular mass of 46.53 kDa after removal of the signal peptide.

分子特征: ULBP2 (Gly26-Ser216) hFc(Glu99-ALA330)

纯化: The purity of the protein is greater than 95% as determined by SDS-PAGE and Coomassie blue staining.

Formulation & Reconstitution: Lyophilized from nanodisc solubilization buffer (20 mM Tris-HCl, 150 mM NaCl, pH 8.0). Normally 5% – 8% trehalose is added as protectants before lyophilization.

储存和运输: Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient temperature.
