

Product Description

Pioneering GTPase and Oncogene Product Development since 2010

MICA (DM157) RABBIT MAB

货号: 28501

产品全名: MICA(DM157) 兔单克隆抗体

基因符号 MIC-A; PERBII.1

描述: MICA antibody(DM157) 兔单克隆抗体

背景: This gene encodes the highly polymorphic major

histocompatability complex class I chain-related protein A. The protein product is expressed on the cell surface; although unlike canonical class I molecules it does not seem to associate with beta-2-microglobulin. It is a ligand for the NKG2-D type II integral membrane protein receptor. The protein functions as a stress-induced antigen that is broadly recognized by intestinal epithelial gamma delta T cells. Variations in this gene have been associated with susceptibility to psoriasis I and psoriatic arthritis; and the shedding of MICA-related antibodies and ligands is involved in the progression from monoclonal gammopathy of undetermined significance to multiple myeloma. Alternative splicing of this gene results in multiple transcript variants. [provided by RefSeq; Jan 2014]

经过测试的应用:ELISA; Flow Cyt

推荐稀释比: ELISA 1:5000-10000; Flow Cyt 1:100

种属反应性: Rabbit 亚型: Rabbit IgG

纯化: Purified from cell culture supernatant by affinity chromatography

种属反应性: 人 MICA

成分: Lyophilized from sterile PBS, pH 7.4. 5 % – 8% trehalose is added as protectants before lyophilization.

储存和运输: Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing).

Product Description

Pioneering GTPase and Oncogene Product Development since 2010

Figure 1. MICA protein is highly expressed on the surface of Expi293 cell membrane. Flow cytometry analysis with Anti-MICA (DM157) on Expi293 cells transfected with human MICA (Blue histogram) or Expi293 transfected with irrelevant protein (Red histogram), and Isotype antibody on Expi293 transfected with irrelevant protein (Orange histogram).
