

MOUSE CD38 PROTEIN, HIS TAG

货号: 12129

产品全名: Mouse CD38 蛋白

规格: 10/50/100 µg

基因符号 ADPRC 1;Cd38-r;Cd38-rs1;l-19

目标蛋白: CD38

UNIPROT ID: P56528

描述: Recombinant mouse CD38 protein with C-terminal 6xHis tag

背景: This gene encodes a non-lineage-restricted, type II transmembrane glycoprotein that synthesizes and hydrolyzes cyclic adenosine 5'-diphosphate-ribose, an intracellular calcium ion mobilizing messenger. The release of soluble protein and the ability of membrane-bound protein to become internalized indicate both extracellular and intracellular functions for the protein. This protein has an N-terminal cytoplasmic tail, a single membrane-spanning domain, and a C-terminal extracellular region with four N-glycosylation sites. Knockout mice deficient for this gene display altered humoral immune responses. In addition, knockout mice exhibit higher locomotor activity and defects in nurturing and social behaviors. [provided by RefSeq, Sep 2015]

物种/宿主: HEK293

分子量: The protein has a predicted molecular mass of 30.6 kDa after removal of the signal peptide. The apparent molecular mass of mCD38-His is approximately 35-55 kDa due to glycosylation.

分子特征: Mouse CD38(Leu45-Thr304) 6xHis tag

纯化: The purity of the protein is greater than 85% as determined by SDS-PAGE and Coomassie blue staining.

Formulation & Reconstitution: Lyophilized from nanodisc solubilization buffer (20 mM Tris-HCl, 150 mM NaCl, pH 8.0). Normally 5% - 8% trehalose is added as protectants before lyophilization.

储存和运输: Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient temperature.
