

RHOA MAB

产品名称: RhoA 小鼠单抗

货号: 26007

基因符号: RHOA

描述: RhoA 小鼠单抗

背景: Small GTPases are a super-family of cellular signaling regulators. RhoA belongs to the Rho sub-family of GTPases. Rho proteins play critical roles in many actin cytoskeleton- dependent processes including platelet aggregation, cell motility, contraction, and cytokinesis. It regulates the formation of stress fibers and focal adhesions in fibroblasts and Ca^{2+} sensitivity of smooth muscle contraction.
